RE: Burn-Zol Hazardous Waste Incinerator Closure Plan  
United Technologies Pratt & Whitney  
East Hartford, Connecticut CTD 990672081

Dear Mr. Wing:

Pratt & Whitney is investigating alternatives to the last submittal of the closure plan for the above referenced incinerator dated January 16, 1987. As this work began prior to the receipt of your letter dated January 29, 1988 and encompasses a much larger scope of work, we are requesting a sixty day extension to the revised submittal date as noted in the January 29, 1988 letter.

The alternatives that are being looked at include not only an update to the existing plan addressing the comments made to Mr. Kevin Vidmar and Mr. John Murray in telephone conversations on March 15, 1987 and June 19, 1987, respectively, and your letter dated January 29, 1988 to myself, but, also complete disposal of the entire incinerator train and a hybrid version involving the disposal of certain parts of the incinerator and then decontamination of the remainder. The alternatives are meant to fill several needs; cost effectiveness, timeliness, and increase the potential for immediate approval by EPA.

Even though this investigation was started some time ago, we are forced to interface with firms who specialize in this type of work and are awaiting proposals and cost estimates from them.

Your consideration in this matter is appreciated.
